

## What can you expect from a company start-up Consultation?

As a first time contractor the information to digest on running a limited company can be overwhelming and you need to do your due diligence on your responsibilities and implications of contracting through a limited company.

In a typical consultation we will guide you through a series of decisions that need to be taken in the following areas:

1. **Is a Limited company the correct structure?** – Analysis of your unique situation and comparison of different contractor structures.
2. **IR35** - Review your understanding of IR35, view our recommendation and plan for IR35 contingency if you are uncertain.
3. **Do you require a contractor accountancy solution?** - Our flexible range of services allows you to choose the level of support that you require.
4. **VAT review** - Review and recommend whether the VAT scheme you are or are not using is right for your situation.
5. **Salary Review** - Review the salary you are paying and its impact on your income.
6. **Dividend Policy review** - Review what dividends you pay yourself and its affect on the tax you pay.
7. **Tax planning and Company investments** - Should you be investing surplus income into such things as a personal pension and are you structuring your affairs for tax efficiency?

You will be able to view the impact that each decision has on how you can benefit financially and compare this with other structures

### After your Consultation

We will present you with a full analysis and summary of your decisions and our recommendations.

I will call to confirm a consultation time with you, where we can determine your unique requirements.
